Read this document and the quick guide before installing the product. Installation and operation must comply with local regulations and accepted codes of good practice.

This appliance must only be installed by an appropriately qualified electrician.

Children shall not play with the appliance. Persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge shall not install the appliance, modify or repair related electrical installations.

1. General information

1.1 Target group

These installation and operating instructions are intended for professional users.

1.2 Hazard statements

The symbols and hazard statements below may appear in Grundfos installation and operating instructions, safety instructions and service instructions.

DANGER

Indicates a hazardous situation which, if not avoided, will result in death or serious personal injury.

WARNING

Indicates a hazardous situation which, if not avoided, could result in death or serious personal injury.

CAUTION

Indicates a hazardous situation which, if not avoided, could result in minor or moderate personal injury.

The hazard statements are structured in the following way:

SIGNAL WORD

Description of hazard

Consequence of ignoring the warning.

- Action to avoid the hazard.

1.3 Notes

The symbols and notes below may appear in Grundfos installation and operating instructions, safety instructions and service instructions.

Observe these instructions for explosion-proof products.

A blue or grey circle with a white graphical symbol indicates that an action must be taken.

A red or grey circle with a diagonal bar, possibly with a black graphical symbol, indicates that an action must not be taken or must be stopped.

If these instructions are not observed, it may result in malfunction or damage to the equipment.

Tips and advice that make the work easier.

2.2 Electrical connection

DANGER

Electric shock

Death or serious personal injury

- Switch off the power supply before starting any work on the product. Make sure that the power supply cannot be accidentally switched on.
- Never work on live wires.
- The float switch must be earthed.
- Ensure that neither water nor moisture can enter via the cable ends.

Observe these instructions for explosion-proof products.

The electrical connection must be carried out by an authorised electrician in accordance with local regulations.

For installation in EX-Zones 0 and 1, the use of an intrinsically safe electrical circuit relay is mandatory.

2. Installing the product

2.1 Mechanical installation

The float switch is freely suspended from a highly flexible, heavy-duty cable and set at the required level "On, Off or Alarm". The position of the float switch changes with the rise and fall of the water level. A micro switch opens and closes the circuit, switching a pump on or off or triggering an alarm. One float switch is required respectively for each switching impulse. It is very important to ensure that the float switch can hang freely, does not lie on the ground, can operate without interference by shaft walls, pipes or fittings etc. and is not directly in the liquid flow. The power cable of the float switch must be carefully laid along its entire length to prevent any risk of mechanical damage. Also ensure that moisture cannot penetrate cable ends. See fig. 1.

Valid for MS1 Ex only

To avoid the risk of the buildup of an electrostatic charge, the casing of the float switch must be connected to the equipment's potential equalisation system using the potential equalisation conductor in the connection cable.

3. Product introduction

The MS1 and MS1 Ex float switches are ON/OFF switches. Gold-plated contacts ensure operation at extra low voltage. The MS 1 float switch is specially designed for use in wastewater treatment plants and in pump stations which handle liquids polluted with solids. Thanks to its good chemical properties, it is resistant to a wide range of liquids. Resistance list: raw sewage, fecal discharges, slurry, household sewage, discharge water from washing machines, baths and showers, detergents, emulsions containing petrol, diesel oils, fats, oil, acids etc. rain water, groundwater, chlorinated water.

The MS1 Ex float switch can be used in a certified, intrinsically safe-circuit electrical system for the control and regulation of liquid levels in Zones 0, 1 and 2 Ex- areas. It can also be used in the presence of gas groups IIA, IIB and IIC, where there is a risk of explosion when these are in contact with flammable materials and exposed to temperatures in the range T1 - T6.

4. Servicing the product

DANGER

Electric shock

Death or serious personal injury

- Before starting any work on the product, make sure that the power supply has been switched off and that it cannot be accidentally switched on.

WARNING

Toxic material

Death or serious personal injury

- Before entering the pit, make sure that the pit is ventilated according to local regulations. If not, do not enter the pit.

CAUTION

Biological hazard

Minor or moderate personal injury

- Use gloves and other suitable personal protection equipment in accordance with local regulations. Observe local regulations on exposure to wastewater.

If the float switch is installed and assembled correctly, it should work practically maintenance-free for many years. Depending on the level of contamination in the medium, the system only needs to be checked from time to time and the float switch cleaned, if necessary.

6. Disposing of the product

This product or parts of it must be disposed of in an environmentally sound way:

1. Use the public or private waste collection service.
2. If this is not possible, contact the nearest Grundfos company or service workshop.

The crossed-out wheelie bin symbol on a product means that it must be disposed of separately from household waste. When a product marked with this symbol reaches its end of life, take it to a collection point designated by the local waste disposal authorities. The separate collection and recycling of such products will help protect the environment and human health.

See also end-of-life information at www.grundfos.com/product-recycling.
